

GAP ASSESSMENT PLATFORM

gapassessment.ai

Benchmark yourself against multiple compliance frameworks

Pick the frameworks that apply, answer a guided set of questions, and get a scored gap report with AI-written remediation - instantly. Assess ISO 27001, SOC 2, GDPR, HIPAA, PCI DSS and more

THE GAP ASSESSMENT CHALLENGE - WHERE EVERY BASELINE STARTS TODAY

✓ Where do we start?

Hundreds of clauses per framework, and no idea which you already meet.

✓ Framework overlap

ISO 27001, SOC 2 and GDPR share controls, assessed three times over.

✓ Spreadsheet sprawl

Assessments live in sheets nobody can version, score or reopen.

✓ Consultant bottleneck

The first baseline waits weeks for a consultant to be free.

✓ No score to act on

Findings arrive as prose, with nothing ranking what to fix.

✓ Lack of Action Items

No idea of what to do with the gaps identified to ensure readiness

A Gap Assessment, Instantly Scored

➤ 40+ Compliance Frameworks

ISO 27001, SOC 2, GDPR, HIPAA, PCI DSS & more

➤ Guided, Not Auto-Pilot

Curated questions, cited to the clause

➤ Real-Time Scoring

Live scorecard, category by category

➤ Organised by Control Area

Every question grouped by the control it tests

➤ AI Remediation Report

Numbered fixes for every gap found

➤ Consolidated Reports

Several frameworks, one report

➤ Built for Teams

Invite-only, every answer attributed

➤ Resume Any Time

Progress saves as you go

➤ Custom Assessment Links

We build the set, you get a secure link

➤ Board-Ready PDF Reports

Your logo, your organisation name

➤ Smart N/A Handling

Mark N/A with a reason, no score penalty

➤ Security & Governance

SSO, VAPT-tested, encrypted at rest

MULTI-FRAMEWORK

ISO 27001, SOC 2, GDPR, HIPAA, PCI DSS & more

CURATED QUESTIONS

Cited to the clause

INSTANT

Scored gap report with AI remediation

INSIDE THE PLATFORM

What GAP ASSESSMENT AI does for you

A defensible compliance baseline, without waiting on a consultant's calendar.

Guided Assessment Flow

Curated catalogue questions grouped under the control area they test and cited to the clause, with room for remarks and free-text detail on any answer. Mark anything N/A with a reason and it will not count against your score.

Outcome: **defensible, cited findings**

Real-Time Scoring

The score moves as you answer – no waiting for a write-up. Per category breakdown, risk bands of high, moderate and low, and the top gaps surfaced up front so you know what to fix first.

Outcome: **a defensible baseline the same day**

A 40-Framework Catalogue

4,160 curated questions across the catalogue, from 31 for ISO 22301 to 385 for ISO 27701. Run several frameworks in a single pass and the shared controls are covered once. Framework not listed? Request it and we add it.

Outcome: **one pass, no duplicated effort**

AI Remediation Report

One entry per gap – the question, your answer and why it fails – turned into numbered steps you can hand to an owner. Written against the control it fails, each fix showing the evidence it was grounded in, web-verified with anything unconfirmed flagged.

Outcome: **every gap becomes a numbered fix**

Scored Reports on Demand

Executive summary, per-category scorecards, per-question findings and the full question-by-question Q&A with your remarks included – carrying your logo and organisation name, consolidated across frameworks, downloadable as PDF.

Outcome: **board-ready the moment you finish**

Built for Teams

Owner and Editor roles, invited by email address per assessment. Invite-only with no shareable link and sign-in matched to the invited address. Live presence shows who is working, and every answer records its author and time.

Outcome: **one assessment, one score, everyone's input**

Custom Assessment Links

Not sure which framework applies? PRB assembles the frameworks and questions that fit you and sends a secure link by email. No account needed, answers attributed to the name entered, progress tracked and each framework scored separately.

Outcome: **a tailored assessment, no setup**

Security & Governance

Google and Microsoft SSO, owner and editor access control, invite only sharing, answer attribution and encryption at rest – on a platform that has been security-tested (VAPT).

Outcome: **your answers sit somewhere tested**

40 FRAMEWORKS, GROUPED INTO THREE FAMILIES

SECURITY & PRIVACY

ISO 27001 · ISO 27701 · NIST CSF · TISAX · GDPR
· SOC 1 & SOC 2 · ADHICS · UAE IAR

QUALITY, EHS & CONTINUITY

ISO 9001 · ISO 14001 · ISO 45001 · ISO 22301 ·
NCEMA 7000 · ISO 50001

GRC, REGIONAL & EMERGING

ISO 31000 · ISO 37301 · ISO 42001 · ESG

A selection of the 40 – framework not listed? Request it from the catalogue and we will add it.

HOW AN ASSESSMENT RUNS

Select the frameworks that apply → Assess through guided, curated questions → Score live, category by category → Resume where you left off, any time → Remediate with AI-written fixes → Report as a scored PDF with priority gaps. · Answers save as you go, so the assessment survives interruptions; switch frameworks inline and assess several in one thread; reopen after remediation to measure the delta. Q&A only – nothing to upload.
